

# Enhance your network's quality of life, for less than you think.

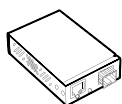

With ProLabs OEM compatible optical connectivity solutions.

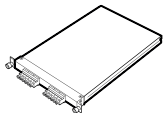

## Transceivers

## Direct Attach and Active Optical Cables

## Media Converters

## Multiplexers

Healthcare institutions of all sizes are facing increased IT Infrastructure challenges due to budgetar constraints. This is coming at a time when your doctors are needing faster speeds and greater network connectivity to care for their patients.

### Our solutions give you flexible connectivity

- Single transceiver vendor for your entire network with greater than 50% savings versus OEM.
- Maximize use of existing fiber infrastructure with bi-directional and WDM transceivers, eliminating need to pull additional fiber.
- Re-use embedded copper for up to 10G utilizing existing SFP+ switch ports.
- Compatible DAC's and AOC's up to 100G for short reach connectivity.
